

.NET Developer

Job Description

Accountix produces a payroll and human resource management suite for the Professional Employer Organization (PEO) industry. Essentially, we make software that allows a PEO company to process payroll for their clients. Our software helps them manage all of their front end and back end office operations.

As a member of our small team, you'll be able to contribute and make a difference to all facets of the products we make. We're looking for someone that can work well with small groups, has excellent communication skills, both written and verbal, and can bring new ideas to the table.

Responsibilities

- Responsibilities will include designing, maintaining, and debugging our software applications
- Use best practices to write and refactor maintainable code.
- With support staff, identify bugs in the software and determine best course of action to correct
- With development staff, design new features in the software
- Participate in implementation, testing, and deployment of applications as needed.
- Work with other development staff to improve internal workflows and development processes

Minimum Requirements

- BS in Computer Science or equivalent experience
- 5+ years of experience with Microsoft development environment utilizing C# .NET WinForms, ASP.NET, and SQL Server.
- Advanced development skills with HTML, CSS, and Javascript.
- Experience writing and using HTTP RESTful APIs
- Experience with Git style source control
- Proficiency with MS Office (Word, Excel, Outlook)
- Must be U.S. citizen or authorized to work in the U.S. on a permanent basis.

Preferred Additional Skills, Knowledge, or Abilities

- Experience with Microsoft Azure DevOps or Team Foundation Server CI/CD pipelines
- General accounting principles
- Knowledge of back end office operations

Salary – Negotiable DOE

Benefits – Retirement, Supplemental Insurance
