

Software Developer

Description: Software Developer

Our main product, Extreme, is a payroll management suite targeted for the Professional Employer Organization (PEO) and Administrative Services Organization (ASO) industries. Our product is primarily a desktop Windows application, written in C#.NET. We also have a client web portal application that allows our clients to provide access to their customers. We're looking for developers with a strong ability to understand business operations including, but not limited to, payroll, accounts receivable, accounts payable, general ledger, health benefits and retirement plans. We are a small company that works closely with our clients, often implementing custom features to help them grow their business. Good communication and interpersonal skills are must have characteristics of anyone we hire.
